FROM PRINCIPAL'S DESK

“Education is not preparation for life but,
Education is life itself.”

Dr. Reeta Saxena
Principal

The adults of today with their education and experience of yesterday have to prepare students for tomorrow. The most important skills to be developed among students is 'the ability to learn, unlearn and relearn' and the ability to source information and resources as and when required.

Scholar Mission is a breath of fresh air for 'Generation Next'. We have turned the classroom into a vibrant stage where effervescent children love to perform. We attend to the specific needs of each child. Here education is not teacher - centric any longer, it endorses experience - centric and student - centric learning based on learning by doing theory, where teacher is not an instructor but a facilitator in a true sense.

The task of preparing the students for life is undoubtedly arduous and challenging but its fruitful results make it worthwhile. Educationists and parents today, cradle the future of not only our children, but of the nation at large. For the smart kids of the next generation, we need smart - technology with smart teachers.

Gone are the days when students could be treated as wells of vacuum, requiring a filling up of factual details.

At Scholar Mission, we believe that knowledge is not a dull chapter that is a must to be instilled in impressionable minds to make them succeed in an unending rat race. Rather, for us it is transfusing the love of learning in such a way that text-books become the passport to the world of possibilities, a chronicle to discovery and the origin of inspiration.

SPORTS COMPLEX

A 'wealthy' mind is complemented with a healthy body and a healthy body is gained from daily exercises and sports. The sports complex has all the facilities for major sports like cricket, football and athletics with designated grounds for each. It also possesses courts for basketball, badminton, lawn tennis, and Volleyball. The other features of the sports complex are a splash pool for junior students, a grand swimming pool for the seniors and a gymnasium which is accessible to all the children.

INFIRMARY

At school the children are safeguarded at all times with a medical and health facility centre. The school has a four bedded infirmary with a trained doctor and trained staff nurses to provide all possible medical care at the time of emergencies. Health record is maintained for each child.

VISION

At the heart of our ethos is our philosophy of being ambitious for our students to create a learning experience that leads to academic success for every student and also to nurture the key skills which will enable them to succeed anywhere in the world once they step out from the shelter of the school.

Education is a global phenomenon, where we seek excellence, wherever it is to be found and use it to raise our standard. It is our constant endeavor to instill qualities of judgement, self reliance, integrity and self discipline in our students.

We also wish to develop in our students a consciousness of the needs of society and a desire to contribute positively through selfless service, putting the totality of God given talents and acquire knowledge to the service of humanity. We aim to lay foundation of a lifelong educational experience, which will give individual confidence and respect that will overcome all distinctions of race, class and creed.

MISSION

To nurture young minds to focus on their holistic development and to develop their conducive learning environment that inspires excellence and encourages high performance.

We promote a safe, caring and supportive environment where every person can learn from and respect one another.

We wish to induce in our students the ability to reach out to serve and help people in need and be driven by comparison in their hearts and purity of mind. Conscious efforts are made to develop the virtue of compassion of our students.

We believe, it is the duty of educators to inspire students and facilitate their cognitive stimulation and development.

LANGUAGE LAB

Scholar Mission School also has the facility of a Language Laboratory. This audio-visual aid in modern language teaching that comes with audio, video, internet, games and much more, makes learning faster and more engaging.

MATHS LAB

Mathematics involves thinking logically and reasonably so as to understand how formulae are derived and their applications. In order to enhance learners' mastery and meaningful learning of mathematics, it is necessary to reduce it to the bare minimum level of abstraction with the use of instructional materials.

Our Math Lab equips the 21st century learners with activity based learning and creates a challenging atmosphere for students to hone their mathematical skills. A variety of modern and colourful apparatus helps in making teaching and learning of the subject interactive, fun filled and joyful. Learning of mathematical concepts through concrete materials, hands-on-experiences and real life situations help to enhance analytical and critical thinking of the learners.

LABORATORIES

Profound knowledge has its roots not only in theoretical knowledge but also in knowledge that is practical. The combination of the two is indispensable for a child's all-round development. Our well-equipped laboratories in various disciplines are ideal for focusing on practical knowledge in a student-friendly ambience.

■ Physics ■ Chemistry ■ Biology

THE INFRASTRUCTURE

Gone are the days when a school meant just a basic construction of brick and mortar. Modern days have given birth to modern needs, and to satiate those needs, it is necessary for the foundation to undergo a metamorphosis. Scholar Mission School is the uncompromising outcome of the requirements of the post modern world. The architecture of the building focuses on space and symmetry, logic and innovation.

The school campus is a 'secure home' made possible by several cameras located strategically. The CCTV network covers beyond the concrete infrastructure such as into the sports fields, pavilion and even into the parking areas of the school. Modern-day technology ensures complete security for everyone in the school premises while the advanced fire safety system ensures complete protection.

THE CLASSROOMS

Here, there is room for abundant sunlight and happiness; the classrooms come with space and proper ventilation. Seats are arranged in a way that allows sufficient space for movement, sharing and team work.

THE ASSEMBLY HALL

Our Assembly Hall, provides the perfect platform for prayers, general meeting and extracurricular activities. The spacious assembly hall can accommodate a large number of students.

COMPUTER LABORATORY

Perfect recipe for the success in the contemporary world is a strong knowledge built with modern technology. The computer laboratory housing computers with the latest software not only aids the students to unravel their creativity but also in coping with today's fast-evolving challenges.

LIBRARY

The thirst of knowledge is further quenched by a gigantic school library having books & magazines on Literature, Science, Economics, Social Studies, Travel, General Knowledge & other reference books.

DIGITAL CLASS

A good teacher knows that teaching is the art of helping students to discover things. If we want our students to actively participate in the process of learning, we need to combine use of modern media with effective pedagogy.

The Multiple learning Experience (M-LEx) is based on the promise that the student learns better through a variety of multi sensory experiences & instructionally sound activities including hands-on activities, discussions, debates, creative & critical thinking activities, collaborative research, field trips & use of multimedia. The instructional strategies are expected to help students engage actively with the curriculum. A well designed module permits a child to visualize a subject & grasp it better.

TRANSPORT

School comes closer to home with the efficient Transport Department. This department is responsible for coordinating with the scores of school buses ferrying students and faculty members from different parts of the city to and from the school. Its additional task is to arrange vehicles for visitors, ferry the students of the school to picnics and excursions and to transport students to participate in interschool programmes at different venues.

Each bus has a support staff and every driver is given a mobile phone to ensure easy monitoring of the routes covered with GPS.
